

SUMMARY

Computers and coding enthusiast, loves working on interesting and challenging development projects, constantly seeking for new challenges.

Great team player working and leading.

Looking for an opportunity to work in an innovative and cutting-edge company as a software engineer with an extra passion to front side.

PROGRAMMING EXPERIENCE

- Developing custom dashboards for startup company – GC4U.
- Coded complex OOP web application using both es5 and es6 JavaScript, client side with react JS and server side with node JS – express.
- Being a part of a full-stack development project – a smart alarm clock that is going to wake you up with a different song that you like every day – Rise Up Alarm Clock free.
- Developed an automation tool for updating led commercial screen – using selenium, in nodeJS for Nasi Minimarket.
- Developed virtual reality space game using unreal engine 4.
- Highly experienced in Object-Oriented Programming and design patterns especially in C#.
- Uses Git source control for most of my projects.
- Experience working with a-synchronous code and events.

Programming Languages: C#, C++, C, Java, Assembly, JavaScript.

Others: HTML, CSS, Ajax, XML, strong photoshop skills and motion graphic skills.
