About me

Computers and coding enthusiast, loves working on interesting and challenging development projects, constantly seeking for new things to learn. Looking for an opportunity to work in an innovative and cutting-edge company as a fullstack web developer twith an extra passion to front side.

Proffesional Experience

Frontend web developer | Devalore
May 2019 - Current

Devalore is a project's company that works along side with a variety of Hi-Teck companies. During my job there, I was a part of several teams that developed few large scale products for our happy customers:

- **AnyVision** - Professional Services & Solutions - Fullstack web developer. In a short period of 2 months my team and I, delivered 3 projects based on the company's core feature.
  - Android native app for event's organizers - Java, Kotlin.
  - Integration with custom access control - inhence existing features and performance improvements - Node js.
  - Core product - adding killer features for company's core product - node js, react ,sql, docker, docker-compose, kubernetes.
- **Intel** - custom project that is in use of Intel's engineers - most updated version of react, node js, electron.
- **Refael** - frontend developer, I was a part of a team that makes major design improvemnts in a large scale of an international project - scss, styled component, redux, react.

Frontend web developer | GC4U
Mar 2019 - Jun 2019

During my job there as a freelancer I built a custom dashboard that is in use for the admins of the company.

Operational manager & marketing,advertising | A.A.M.K AHIM NASI LTD | www.supernasi.com
2013 - 2019

As an operational manager, I am tasked with making sure everything in the market is functioning properly, from staff issues to product shortages. Later, I took on the roles of a marketing and innovation leader - making sure that our supermarket keeps up to modern demands.
