SUMMARY – SEEKING FOR FULLSTACK/FRONTEND POSITION.

Computers and coding enthusiast, loves working on interesting and challenging development projects, constantly seeking for new challenges.
Looking for an opportunity to work in an innovative and cutting-edge company as a software engineer with an extra passion to front side.

PROGRAMMING EXPERIENCE

- I set up a personal website that shows some of my great works (react js).
- Developed a custom dashboard for a small company – GC4U.
- Coded complex OOP web application using both es5 and es6 JavaScript, client side with react JS and server side with node JS – express.
- Being a part of a full-stuck development project – a smart alarm clock that is going to wake you up with a different song that you like every day – search for Rise Up Alarm Clock free on google play.
- Developed an automation tool for updating led commercial screen – using selenium, in nodeJS for Nasi Minimarket.
- Highly experienced in Object-Oriented Programming and design patterns especially in C#.
- Uses Git source control for most of my projects.
- Experience working with a-synchronous code and events.

Programming Languages: C#, C++, C, Java, JavaScript.
Others: HTML, CSS, Ajax, XML, strong photoshop skills and motion graphic skills.

EDUCATION 2015 – 2018 (GRADUATE)

B.Sc. in Computer Science | **The Academic College of Tel- Aviv Yaffo**

PROFFESIONAL EXPERIENCE

- **Frontend web developer** | **"GC4U"**
  March 2019 – June 2019
  During my job there as a freelancer I built a custom dashboard that is in use for the admins of the company.
- **Operational manager** | **"Nasi Minimarket"**
  2013-2019
  As an operational manager, I am tasked with making sure everything in the market is functioning properly, from staff issues to product shortages.
- **IDF "Meiter" Special Forces**
  2010-2013 - Was responsible of highly expensive and classified weaponry.
